Warangal, Telangana State - 506013, India

OBJECTIVE

Motivated and detail-oriented Computer Science undergraduate with strong foundations in software development, object-oriented programming, and data science. Skilled in Python, Java, C, and web technologies, with hands-on experience building scalable and user-centric applications. Eager to contribute to innovative teams and grow professionally by solving real-world challenges through technology across diverse industries.

EDUCATION

- **SR University** October 2022-July 2026
BTech in CSE Warangal, India
 - Current CGPA: 8.8

EXPERIENCE

- **Nowcom Global Services India** [\[validate\]](#) June 2024 - July 2024
Software Engineer Intern Greater Hyderabad Area, India
 - Completed one week of intensive training in C# programming, covering both fundamentals and advanced topics.
 - Received one week of comprehensive training on Object-Oriented Programming (OOP) concepts in C#, enhancing knowledge of software design principles.
 - Documented and developed a Unit Converter System using MVC Architecture, applying theoretical knowledge to practical problem solving.
- **Coratia Private Limited (in collaboration with TeachNook)** [\[validate\]](#) September 2022 - October 2022
Data Science Intern Remote
 - Developed a customer churn prediction model for a telecom company using Python, preprocessing data and experimenting with machine learning algorithms like Random Forest, XGBoost, and LightGBM.
 - Evaluated model performance using accuracy, precision, recall, F1 score, ROC AUC, and confusion matrix, conducting in-depth analysis to provide actionable insights for reducing customer churn and improving efficiency by 20%.
 - Documented the entire project, including data exploration, preprocessing, model selection, evaluation metrics, analysis, and business insights.

SKILLS

- **Programming Languages:** C, Java, Python
- **Web Technologies:** ASP.NET MVC Architecture
- **Database Systems:** PLSQL
- **Specialized Area:** Data Science , Machine Learning
- **Other Tools & Technologies:** Visual Studio Code, Visual Studio 2022

PROJECTS

- **CRUD-Based Rock Paper Scissors Game in Python** December 2024
Python | OOP | Random | CLI [\[view\]](#)
 - Developed a command-line Rock Paper Scissors game with full CRUD operations for each round using object-oriented programming in Python.
 - Implemented features to add, update, delete, and reset game rounds while maintaining player and computer scores.
 - Ensured a user-friendly interaction flow with input validation and dynamic result calculation using randomization.
- **UNIT CONVERTER SYSTEM IN C** May 2022
C | DevC++ [\[view\]](#)
 - Developed a unit converter system in C for temperature, mass, currency, and length conversions that is user-friendly.
 - Implemented accurate conversion formulas and calculations across multiple categories
 - Collaborated effectively in a team environment, utilizing version control and communication.
